OFFICE OF THE DIRECTOR

APR 11 1958

NSC REVIEW COMPLETED

Honorable Allen W. Dulles
Director
Central Intelligence Agency
Washington 25, D. C.

Dear Mr. Dulles:

This office, through the Interdepartment Radio Advisory Committee (IRAC), has been engaged intensively since October 1955 in an evaluation of United States requirements for radio frequencies for national defense, radionavigation and other national radio operations in the existing and foreseen situations. This evaluation was undertaken to provide allocations which are more adequate and equitable than those provided in the present Table of Frequency Allocations and to assist in the formulation of the U. S. proposals for the Administrative Radio Conference scheduled to begin July 1, 1959.

The IRAC has submitted to this office its recommendations for essential changes in the National Table of Frequency Allocations and for revision of Chapter III and related parts of Article I of the Atlantic City Radio Regulations. A copy of my letter to the Federal Communications Commission in coordination is enclosed. A copy of the IRAC report has been transmitted to you separately.

The IRAC has worked separately and with the FCC Liaison Representative to the IRAC, to develop frequency allocations which would be in the over-all national interest. It is considered that the IRAC recommendations represent the best solution which can be found at this time. I have approved the recommendations of the IRAC for the purpose of coordination with the Commission and the several Government agencies which are not represented on the IRAC.

Your views and comments on the proposals will be welcome.

Sincerely yours,

[(Signed)] Gordon Gray

Gordon Gray
